MANAGEMENT DISCUSSION & ANALYSIS REPORT

The Management of the Company is pleased to present this report covering the activities of the Company during the year ended on March 31, 2017

Macro Economic Environment Overview

Economic outlook

The Indian economy's strength and the long-term dynamics continue to work in its favour, steering it towards establishing a leading global position. With positive indicators such as a stable 7-9% annual growth pattern, adequate foreign exchange reserves, a robust capital market and rapidly expanding FDI inflows, India is competing with major international economies to emerge as a nation with global economic stature.

While new economic industries have shown robust growth, conventional economy segments like industrial and services segments, the manufacturing sector, transport and communication sectors and Real Estate have also been major contributors in the Indian growth process.

A minor blip in the economy was noticed when the Prime Minister announced the demonetization of high value currency. Real Estate was a segment which on the basis of perception suffered initially but the recovery is noticed in the last quarter of FY 2017.

Bold initiatives have been witnessed in the long term growth of the Real Estate Sector. Affordable Housing has been given industrial status which would go a long way in giving the much needed credence to the sector and would help it to negotiate favourable terms for long term funding.

GST Impact on India Real Estate Sector:

The Goods and Services Tax (GST) is beyond doubt the most revolutionary tax related reform to be seen in India in several decades, since it will eliminate the conflicting and cascading taxation structures which have confounded several industries over the past few decades. It will most certainly have a profound effect on India's economic prospects.

A single indirect tax which covers all goods and services will, in the long run, increase tax collection by making it easier for retailers and several other business to comply and also moderate overall taxation levels. It should be remembered that the favorable effects will become evident only 2-3 years of its implementation.

The tax rate applicable for real estate is 12% bracket. However, the GST rate is not the only important factor. The abatement rules as applicable under the service Tax regime and the input tax credit facility for developers will determine if the effective tax incidence on real estate is lower or higher under GST.

The GOI has offered some clarity on the abatement rules for under construction houses and input tax credit benefits for developers.

Real Estate (Regulation and Development) Act 2017 (RERA) the game Changer:

The Government of India has enacted the Real Estate (Regulation & Development) Act 2016 (RERA) and all the sections of the Act have come into force with effect from May 1, 2017. Maharashtra was one of the first States to notify its rules under the Act and establish Maharashtra Real Estate Regulatory Authority (Maha-RERA)

The Act seeks to address issues like delays, price, quality of construction and titles and other changes.

The RERA, aimed at bringing in transparency and redefining the engagement between the various stake holders, can be a potential game changing event. The level playing field created by RERA would provide much needed confidence to investors and home buyers to take a relook at the sector and make a informed investment decisions. While the Act might transform the way in which the various stake holders operate, it will particularly have a far reaching impact on residential developers, who would need to recalibrate their business practices to stay in the field. The single largest reform that the sector is going to witness is the implementation of RERA. The Real estate sector is one of the most globally recognized sectors and is slated to grow at 30% over the next decade.

Impact on Residential Real Estate:

Sales are not just impacted by tax rates but also by sentiment and also on account of the trust deficit which RERA- now seeks to address. That said, if costs do go higher under GST, the lower prevailing current home loans rates could assuage the impact to some extent.

Buyers and investors as well as developers are understandably worried that the final ticket size of homes will increase at 12% GST. Developers are still awaiting further clarity on this., but they know that it is the interest of their business to keep ticket sizes range-bound.

Industry structure and development

The Company is a part of Marathon Group and is specializing in the execution of Slum Rehabilitation Projects under aegis of the Slum Development Authority.

The Company is jointly developing a slum rehabilitation project in Bhandup situated in the eastern suburbs of Mumbai with Shree Swami Samarth Builders and Developers.

During the year under review:

The Company has made considerable progress in Slum Rehabilitation Project at Bhandup. Substantial portion of the sale building has been completed. The company has transferred the development rights, to Shree Swami Samarth Builders and Developers. It is entitled to a percentage of the saleable area post the merger of the two land parcels which would be delivered to the company post obtaining the Occupation Certificate by SSSBD.

The Company is also entitled to 50% share in the profits of the firm SSSBD lest what it would have received during the pendency of the project.

Substantial portion of the project SSSBD (Navneet Sadan) has been completed Revenue has accordingly been recognized. This has resulted in an increase in profits as can be seen from the financials. The Company has proposed a dividend after a gap of two decades.

The Company's line of business is to provide free housing by way of rehabilitating the erstwhile slum dwellers. The efforts of the company have been well recognized and have come in for praise from neighboring slums who have approached the company to look into their property as well. The company sees tremendous potential in this line of activity. This would be part of the Government's scheme of housing for all by 2020.

The above developments bode well for the company as it has the opportunity to take part in the entire rehabilitation of the slums along with SSSBD.

The Company expects good scope in the future in the line of business..

Opportunities

As reported earlier, urbanization has been progressing rapidly. The Govt. of Maharashtra has realized that rapid urbanization of Mumbai City is of utmost importance and has accordingly drawn up ambitious plans. Your company should benefit from this move.

Threats:

A single window clearance mechanism for approvals, would go a long way in minimizing the time schedule for completing projects.

Risks and concerns

Apart from the increase in land prices, inputs costs have also been constantly increasing. Higher interest cost would dent margins and may have a direct effect on the customer's cash flow as well. Increase in end product prices coupled with tight liquidity may impact demand. The various taxes and levies would add to the costs and this is likely to squeeze margins as end product prices may not go up correspondingly.

The company has a Risk Management Policy, which is being periodically reviewed.

Internal control systems and their adequacy

The internal control commensurate with the activities is supplemented by continuous review by the management. The internal control system is designed to ensure that every aspect of the company's activity is properly monitored.

The Company has harmonious employee relations and there is close interaction between the management and employees to facilitate smooth functioning of our organization activities.
